

MASTER
MA 3 / PJ 1-3 / SP & 2.2 (PIV)
Wintersemester 10/11

OBERE STADTSPREE

- commercial
- transport/trade & exchange
- entertainment
- creative industries

These categories are not complete – abandon them and develop your own definitions as needed. Use these categories and define a spatial typology for each, as you have found them:

- Which physical (and metaphysical) elements /components make up the conditions you have defined?
- How do the city and the water come together spatially here?
- Looking more closely at the nature of the river, what does this medium contribute to the site?

Use abstract spatial definitions to describe the site condition and atmosphere- platform, edge, void, container/store vessel, extension, implant, bridge..

In groups of two, produce 1 DIN A2 panel illustrating your documentation of the chosen area and build two models. The model scale is 1:500.

part B : presentation

on Friday, 03.12.2010, 11 a.m.
at the Herwart + Holz office

Please bring models and panels.
